

# ANT MEDIA SERVER

Ant Media Server supports WebRTC, CMAF, HLS, RTMP, RTSP and much more

## Number of users on Ant media server in numbers

- 01** Across 129 countries  
Worldwide
- 02** Over 2 Billion Minutes  
of connections every month
- 03** 7,390 Instances  
Actively running

## Scalable, Ultra Low latency and Adaptive WebRTC Streaming with ~500ms latency

**Ultra Low Latency Streaming**

Increase interaction and experience real-time video streaming. Ant Media Server WebRTC Streaming Solutions provide less than 0.5 seconds latency..

**Adaptive Bitrate Streaming (ABR)**

Reach a broader audience with Adaptive Bitrate Streaming. Adaptive Bitrate makes it possible to play real-time streams on every screen at any internet speed.

**Auto-Scalable Live Streaming**

Effortlessly scale with auto-scalable cluster for thousands of publishers and viewers. Achieve sub-0.5s latency, support WebRTC, CMAF, DASH, HLS, RTMP, RTSP, SRT, and Zixi.

**Live Video Surveillance**

Embed IP camera streams into websites and mobile apps to broadcast video. AMS is compatible with ONVIF IP cameras with PTZ and Auto Discovery features.

**Free WebRTC Live Streaming SDKs**

Build your own Video Streaming Application with Ant Media Server WebRTC SDKs for iOS, Android, Unity, React Native, Flutter and JavaScript.
